STM32 Nucleo starter pack with LoRa® HF band sensor and gateway

STM32 Nucleo pack
LoRa® HF band sensor and gateway

LoRa® sensor device
- STM32L073Z Nucleo Development Board (from STMicroelectronics)
  - STM32L073Z ultra-low-power MCU
  - Arm® Cortex®-M0+ 32 MHz, 192 Kbyte Flash memory and 32 Kbyte SRAM
  - Supports Arduino® Uno V3 and ST morpho connectors
  - Embedded ST-LINK/V2-1 debugger and programmer

LoRa® gateway
- STM32F407ZGT6 Nucleo Development Board (from STMicroelectronics)
  - STM32F407ZGT6 high-performance MCU
  - Arm® Cortex®-M4 216 MHz, 1 Mbyte Flash memory and 320 Kbyte SRAM
  - Supports ST morpho connector (includes Arduino® Uno V3) and ST morpho connectors
  - Ethernet 10/100 Mbps, USB OTG user connectivity
  - Embedded ST-LINK/V2-1 debugger and programmer

- RFM69HW HF band gateway expansion board (from NISIGIF)
  - Sensirion SX-1272 HF baseline data concentrator

Picture is not contractual.

For further information contact your local STMicroelectronics sales office.
Features

- **NUCLEO-L073RZ** development board (from STMicroelectronics)
  - **STM32L073RZT6** Arm® Cortex®-M0+ ultra-low-power MCU at 32 MHz with 192-Kbyte Flash memory, 20-Kbyte SRAM and 6-Kbyte data EEPROM
  - 1 user LED
  - 1 user and 1 reset push-buttons
  - 32.768 kHz crystal oscillator
  - On-board ST-LINK/V2-1 debugger/programmer with USB re-enumeration capability: mass storage, Virtual COM port, and debug port
  - Board connectors
    - Mini-AB USB connector for the ST-LINK
    - ARDUINO® Uno V3 expansion connector
    - ST morpho extension pin headers for full access to all STM32 I/Os

- **NUCLEO-F746ZG** development board (from STMicroelectronics)
  - **STM32F746ZGT6** Arm® Cortex®-M7 high-performance MCU at 216 MHz with 1-Mbyte Flash memory and 320-Kbyte SRAM
  - 3 user LEDs
  - 1 user and 1 reset push-buttons
  - Ethernet compliant with IEEE-802.3-2002
  - USB OTG full speed or device only
  - 32.768 kHz crystal oscillator
  - On-board ST-LINK/V2-1 debugger/programmer with USB re-enumeration capability: mass storage, Virtual COM port, and debug port
  - Board connectors
    - Micro-AB USB connector for the ST-LINK
    - ST Zio expansion connector including ARDUINO® Uno V3
    - ST morpho extension pin headers for full access to all STM32 I/Os
    - USB with Micro-AB
    - Ethernet RJ45

- **I-NUCLEO-LRWAN1** LoRa® HF band (868/915/923 MHz) sensor expansion board (from USI®)
  - USI® WM-SG-SM-42 low-power long-range LoRaWAN® module, based on the STM32L052 MCU and Semtech SX1272 transceiver
  - STMicroelectronics HTS221 temperature and humidity sensor
  - STMicroelectronics LPS22HB pressure sensor
  - STMicroelectronics LSM303AGR accelerometer and gyroscope sensor

- **LRWAN_GS_HF1** LoRa® HF band (868/915/923 MHz) gateway expansion board (from RisingHF)
  - SX1301/SX1257 HF baseband data concentrator and transceiver
    - Automatically adaptive to spreading factor from SF12 to SF7 in each of 8 channels
    - High sensitivity down to -140 dBm at 300 bit/s
    - 6 dBm output power
    - Support LoRaWAN® protocol Class A and Class C
    - Support Semtech packet forwarder
    - Support DNS and NTP
Description

The P-NUCLEO-LRWAN2 STM32 Nucleo starter pack for LoRa® technology and high-performance (G)FSK/OOK/(G)MSK modulations is a development tool to learn and quickly develop low-power wide-area network (LPWAN) solutions. The pack contains both an LPWAN end-node and its related gateway. It is compatible with various LoRaWAN® network server providers. P-NUCLEO-LRWAN2 is intended for countries granting radio-communications access in frequency bands higher than 800 MHz.

On the gateway side, the NUCLEO-F746ZG board, based on a high-performance STM32F7 Arm® 32-bit microcontroller, controls a RisingHF ARDUINO® expansion board (LRWAN_GS_HF1) used as a basic LoRaWAN® packet forwarder. In that way, data coming from the development node can reach LoRaWAN® network servers directly.

On the sensor-node side, the NUCLEO-L073RZ, based on an ultra-low-power STM32L0 Arm® 32-bit microcontroller, controls a USI® I-NUCLEO-LRWAN1 ARDUINO® expansion board used as a sensor node.

The I-NUCLEO-LRWAN1 end-node is an ARDUINO® compatible expansion board. This board is designed by USI® around a LoRa® module powered by an STM32L05 device hosting a friendly AT command stack. This makes user development and access to the LoRa® technology easier. In addition, this expansion board features several sensors from STMicroelectronics: accelerometer and gyroscope (LSM303AGR), MEMS pressure (LPS22HB), and humidity and temperature (HTS221).
1 Ordering information

To order a P-NUCLEO-LRWAN2 LoRa® HF band sensor and gateway Nucleo starter pack, refer to Table 1. For a detailed description, refer to the user manual on the product web page. Additional information is available from the datasheet and reference manual of the target STM32.

**Table 1. List of available products**

1. “Getting started” user manual.

1.1 Product marking

Evaluation tools marked as “ES” or “E” are not yet qualified and therefore not ready to be used as reference design or in production. Any consequences deriving from such usage will not be at ST charge. In no event, ST will be liable for any customer usage of these engineering sample tools as reference design or in production.

“E” or “ES” marking examples of location:

- On the targeted STM32 that is soldered on the board (for illustration of STM32 marking, refer to the STM32 datasheet “Package information” paragraph at the [www.st.com](http://www.st.com) website).
- Next to the evaluation tool ordering part number that is stuck or silk-screen printed on the board.
2 Development environment

The STM32 32-bit microcontrollers are based on the Arm® Cortex®-M processor.

*Note:*  
Arm is a registered trademark of Arm Limited (or its subsidiaries) in the US and/or elsewhere.

2.1 Demonstration software

The demonstration software, included in the I-CUBE-LRWAN STM32Cube Expansion Package, is preloaded in the STM32 Flash memory of each Nucleo board for easy demonstration. The latest versions of the demonstration source code and associated documentation can be downloaded from [www.st.com](http://www.st.com).

2.2 Development toolchains

- Keil® MDK-ARM (see note)
- IAR™ EWARM (see note)
- GCC-based IDEs

*Note:*  
On Windows® only.

2.3 System requirements

- Windows® OS (7, 8 and 10), Linux® 64-bit, or macOS®
- USB Type-A to Micro-B (NUCLEO-F746ZG) or USB Type-A to Mini-B cable (NUCLEO-L073RZ)

*Note:*  
macOS® is a trademark of Apple Inc. registered in the U.S. and other countries.  
All other trademarks are the property of their respective owners.
